

Join the Creativity Training activities and find new talent inside!

The Creativity Training project (2017–2019) inspires adult learners and trainers to develop one important future job skill: creativity. Creativity is the ability to raise new ideas, think outside the box, find unusual solutions, and deal with problems quickly. Creativity gives you the feeling of not missing out!

Accessible education may enhance social inclusion in Finland, Latvia, Lithuania and beyond.

Trainers learn about new creativity training methods which helps them to adjust training program to learners needs. Trainees get higher quality training, improve creativity skills and thus integrate into the labor market. Workshops help us to evaluate the methodology. The project will promote innovation, exchange of experience and know-how between different types of organisations in Nordic/Baltic countries involved in adult education. The final results will be available on project website in June 2019.

CreDev welcomes you to join the project activities and events! Together we make the project success!
